**Problem Statement / Transit Mode Share Target / Evaluation**  
**Framework**

That Council approve the recommendations outlined in Report USDIR10-002A dated April 6, 2010, of the Director of Utility Services, as follows:

- a) That Council receive for information the presentation from Morrison Hershfield Limited on the Comprehensive Transportation Plan Update

**COMMITTEE OF THE WHOLE REPORT NO. 8**  
**MEETING OF APRIL 6, 2010**  
**PAGE 4**

- b) That the following Problem Statement be adopted by Council and be used in undertaking the Comprehensive Transportation Plan Update:

*“Over the planning period extending from 2006 to 2031, population will grow by 13% with most of the growth occurring in the northwest of the city, and employment will grow by 4% with most of the growth occurring in the southwest of the city.*

*The anticipated growth will increase the capacity deficiency in the north-south direction west of the Otonabee River, and in the east-west direction across the Otonabee River and in/out of the Central area. From a network-wide perspective, the anticipated growth will increase the portion of vehicular travel on arterial roads that will experience an unacceptable level of service (i.e. worse than the acceptable threshold of LOS “D” as defined in the Official Plan). During the afternoon peak hour, the percentage of vehicular travel on arterial roads experiencing such conditions will increase from 13% in 2006 to 20% by 2021, and 32% by 2031.*

*In light of the above, there is a need to explore options for bringing the demand on the network and capacity of the network into better balance. Such options may include introduction of new roadways; widening/upgrades of existing roadways; acquisition of new buses to expand service coverage and/or service frequency; and addition of cycling and pedestrian facilities.”*

- c) That the 2021 Transit Mode Share Target of 6% used for transportation modeling and network evaluation purposes approved in the 2002 Comprehensive Transportation Plan Update be retained.
- d) That the Measures of Effectiveness to be used for assessing the relative merits of alternative transportation network improvement scenarios for the Project be:
- Impact on environmental sensitive areas;
  - Fuel consumption by passenger vehicles;
  - Vehicles hours of delay by passenger vehicles;
  - Monetary value of user benefits;
  - Construction costs;
  - Support mobility and performance goals for the road network;
  - Support transit service; and
  - Support active modes of transportation (e.g. walking and cycling).

**COMMITTEE OF THE WHOLE REPORT NO. 8  
MEETING OF APRIL 6, 2010
